

**Maidenhair Fern (*Adiantum aethiopicum*)**

Ferns are one of the oldest and toughest plants on earth, surviving in many different habitats across every continent except Antarctica.

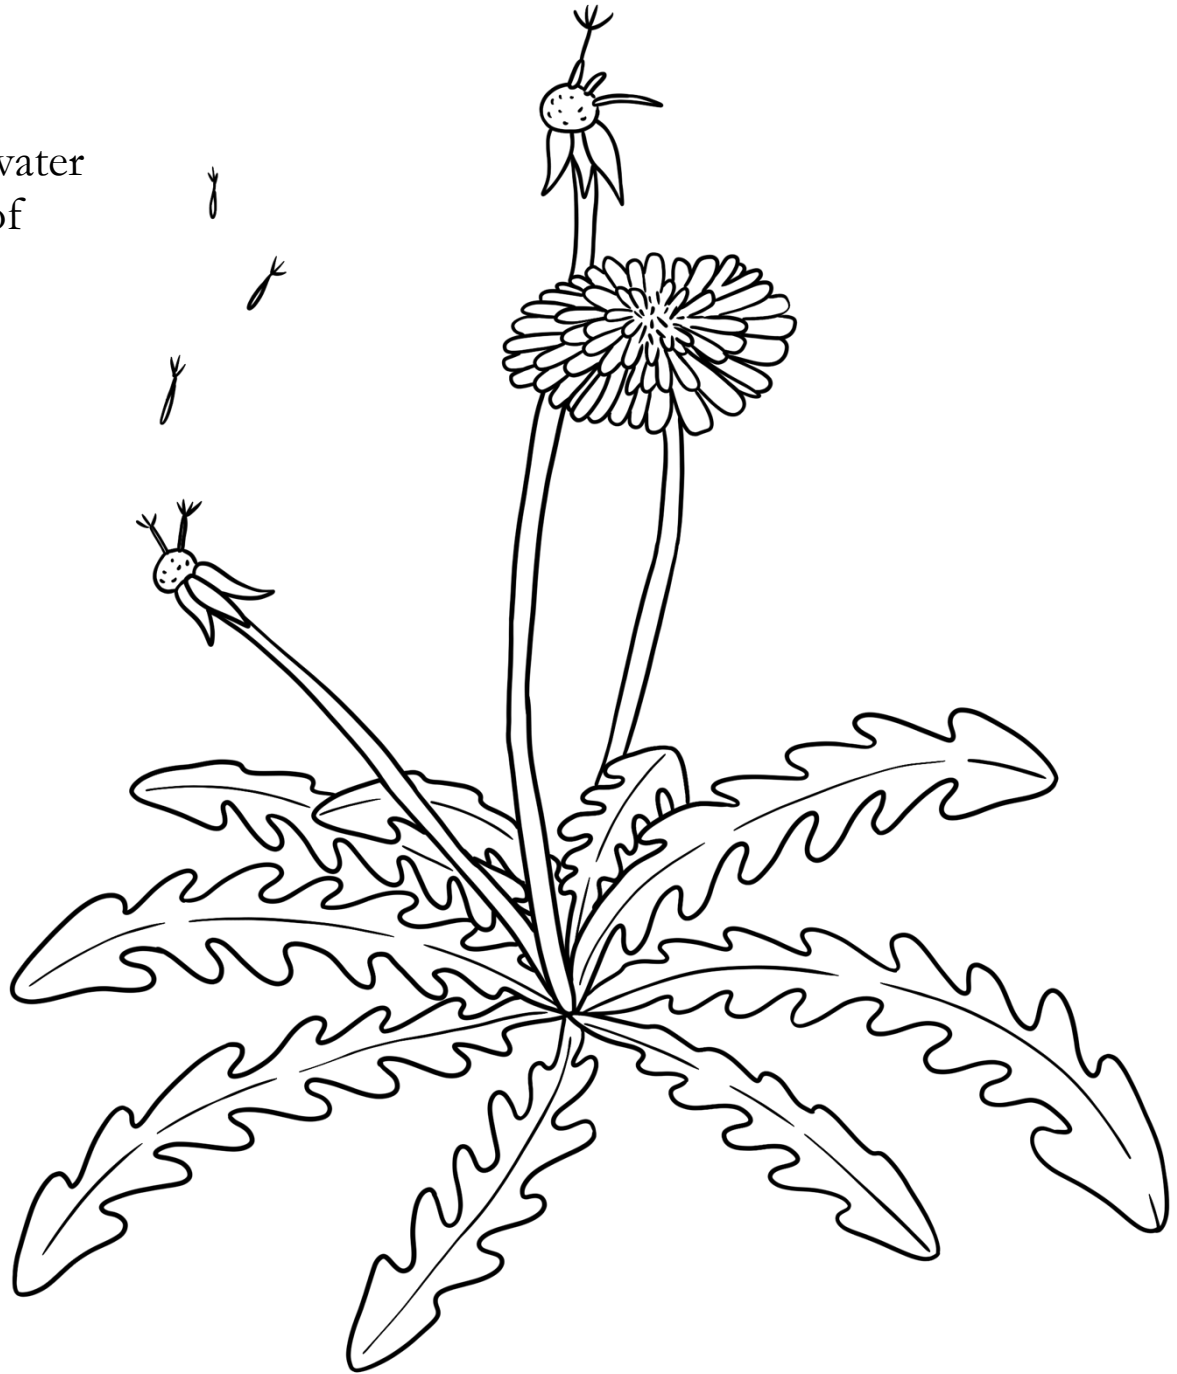

## Gravel Ant (*Iridomyrmex purpureus*)

Gravel Ants, also known as Meat Ants, live in huge nests where every member has a special job. A scout is in charge of finding food and can travel a long way in search of something tasty.

## Dandelion (*Taraxacum officinale*)

Dandelions grow anywhere they can get water and sunlight – in a garden, a lawn, a pile of rubble, or even a crack in concrete.

**Gravel Ant (*Iridomyrmex purpureus*)**

Gravel Ants, also known as Meat Ants, live in huge nests where every member has a special job.
